The Electrotechnology Industry

Searching for an exciting, hands-on career pathway that opens doors to a wide range of opportunities?

The electrotechnology industry could be right for you!

The Electrotechnology industry is one of the most diverse and fastest-growing industries in the world and it continues to expand into new areas of technology at a rapid pace, making it a dynamic career path.

At NCA, we are here to help you find your passion—whether it be for renewable energy, automation, lighting and power, fire protection, technology and telecommunications, engineering, construction, building management systems, service and maintenance... the options available in the electrotechnology industry are limitless.

**SIMPLY CONTACT NCA TO
SWITCH ON YOUR CAREER TODAY.**

● APPLY TODAY

Apply via our website:

www.necaapprentices.com.au

Candidates must satisfy minimum criteria which is outlined on our website.

▼ ASSESSMENT

Successful candidates will be asked to attend a Literacy and Numeracy test called the Readiness Assessment (RA).

▼ INTERVIEW & MEDICAL

Candidates who are successful will be invited to an interview with NCA. Selected candidates then attend a medical assessment.

▼ SUCCESS

Congratulations! You now have the opportunity to become a NCA Apprentice.

▼ ONGOING SUPPORT

Receive ongoing mentoring, support, development and opportunities for career progression from the NCA team.
